

HAFIZ NAVEED UDDIN

Agentic AI Developer • Full-Stack Engineer • Cloud & DevOps Architect

Cybersecurity Specialist | Prompt & Context Engineer

Karachi, Pakistan | +92 300 2385209 | HNAVEED264@gmail.com
linkedin.com/in/hafiz-naveed-uddin | github.com/hafiznaveedchuhan-ctrl | Portfolio

PROFESSIONAL SUMMARY

Forward-thinking **Agentic AI Developer & Architect** with deep expertise in autonomous AI systems, generative models, and AI-driven full-stack development. I design and deploy intelligent, self-directed agents using the **Model Context Protocol (MCP)**, modern LLM toolchains, and cloud-native architectures. Anthropic Academy certified across 8 specialization courses — including MCP (Intro + Advanced), Claude Code, Agent Skills, Subagents, Claude API, Claude Platform, and AI Fluency — one of the most comprehensively certified engineers globally on the Anthropic stack. My unique strength lies in fusing **three rare disciplines** — agentic AI engineering, production-grade full-stack development, and enterprise-level cybersecurity — to build scalable, secure, and intelligent systems end-to-end. Actively delivering solutions across Docker, Kubernetes, AWS, GCP, and CI/CD pipelines, with a relentless focus on quality, security, and measurable impact.

CORE EXPERTISE

AGENTIC AI	MCP Servers • Tool Use • Autonomous Agents • Multi-Agent Orchestration • Custom GPTs • LangChain • OpenAI / Claude / Gemini APIs
AI-DRIVEN DEV	Prompt Engineering • Context Engineering • Spec-Driven Development (SDD) • Generative Models • RAG Systems • Vector Databases
FULL-STACK	TypeScript • React • Next.js 14 • Node.js • FastAPI • Python • Tailwind / Chakra UI • Sanity CMS • REST / GraphQL APIs
CLOUD & DEVOPS	Docker • Kubernetes (K8s) • AWS (EC2, S3, RDS, Lambda) • GCP • CI/CD (GitHub Actions, GitOps) • IaC (Terraform) • Microservices
OBSERVABILITY	ELK Stack • Prometheus • Grafana • Service Mesh • Event-Driven Architecture • Disaster Recovery • Production Monitoring
CYBERSECURITY	SIEM (QRadar, LogRhythm, Splunk, Wazuh) • EDR (CrowdStrike, Cisco) • SOC Operations • Threat Detection • Penetration Testing

TECHNICAL TOOLBOX

Languages & Frameworks: Python • TypeScript • JavaScript (ES6+) • HTML5/CSS3 • React.js • Next.js • Node.js • FastAPI
AI / ML Ecosystem: OpenAI API • Anthropic Claude API • Google Gemini • MCP Protocol • LangChain • LlamaIndex • Hugging Face • Google Colab • Vector Databases
Cloud & Infrastructure: AWS (EC2, S3, RDS, Lambda, CloudFormation) • GCP • Docker • Kubernetes • Terraform • GitHub Actions • GitOps • Helm • Container Registries
Security Stack: IBM QRadar • LogRhythm • Splunk • Wazuh • Fortinet FortiSIEM • CrowdStrike Falcon • Cisco Secure Endpoint • PICUS • Kali Linux
Design & Content Tools: Figma • Chakra UI • Tailwind CSS • Sanity CMS • UI/UX Design • Google Sheets API Integration • Vercel Deployment

PROFESSIONAL EXPERIENCE

SOC Analyst (L1) Oct 2024 – Jan 2025

COMMTEL Cyber Security Solutions • Karachi, Pakistan

- ▶ Completed a 3-month intensive Security Operations Center (SOC) program with hands-on threat detection, log analysis, and incident response on enterprise infrastructure.
- ▶ Operated enterprise-grade SIEM platforms: IBM QRadar, LogRhythm, and Wazuh — building and tuning alert rules, correlation searches, and custom dashboards.
- ▶ Leveraged EDR tools including CrowdStrike Falcon and FortiSIEM to identify, contain, and triage advanced persistent threats in real time.
- ▶ Established a strong operational foundation in 24/7 cyber defense, incident escalation protocols, and threat intelligence integration.

Sales Executive Jul 2020 – Present

Falak Naz Group (Real Estate Developer) • Karachi, Pakistan

- ▶ Lead sales operations, client relationship management, and business development strategy for a major real estate development brand.
- ▶ Translate complex product offerings into compelling narratives for diverse client segments — a skill transferred directly into technical communication and stakeholder engineering.

Junior Clerk cum Stenographer (BPS-11) Jan 2014 – Jan 2023

Malir Development Authority — Government of Sindh • Karachi, Pakistan

- ▶ Managed end-to-end documentation workflows for Allotment, Transfer, Mutation, and CTC processes serving thousands of stakeholders.
- ▶ Maintained systematic records for multiple Sindh Government organizations, developing a strong foundation in data integrity, compliance, and audit-ready documentation.

◎ SIGNATURE PROJECTS — GitHub Portfolio

▶ AI-SOC Platform — Cybersecurity Worker Agent

Certifications: MCP: Advanced Topics • Introduction to MCP • Agent Skills • Subagents • SOC Program

Stack: Next.js 14 • TypeScript • Tailwind CSS • FastAPI • Python 3.11 • LangChain • OpenAI GPT-4 • PostgreSQL (Neon) • RAG + Vector Embeddings

Enterprise-grade AI Security Operations Center with 7 specialized autonomous subagents for real-time threat detection, alert triage, and incident response. Processes 10,000+ daily security alerts and reduces actionable items to ~1,000 with 95% detection accuracy. Features RAG-powered knowledge retrieval over a 25-hour cybersecurity corpus, multi-agent orchestration using agent skills for coordinated defense, and production-grade dashboards for live SOC monitoring.

▶ KSOR Handbook — Knowledge System of Record

Certifications: Introduction to MCP • MCP: Advanced Topics • Claude Platform 101

Stack: MCP Server • Next.js (Static Export) • Node.js/Express • PostgreSQL + pgvector • Gemini Embeddings • Vercel

A governed markdown knowledge base with a custom MCP server, delivering grounded AI responses through semantic vector retrieval and measured refusal. Implements pgvector for high-performance embedding search, enforces strict content governance so AI answers cite only verified knowledge, and deploys as a static Next.js site with real-time API backend — built on Claude Platform architecture and MCP protocol patterns for tool-augmented AI systems.

▶ KSOR Workers — Multi-Agent AI for Amazon Affiliate

Certifications: MCP: Advanced Topics • Claude API • Agent Skills • Subagents • AI and Entrepreneurship

Stack: OpenAI Agents SDK • FastAPI • MCP Server • SQLModel + Async PostgreSQL (Neon) • Inngest • Argon2id + JWT Auth

Production multi-agent AI system powering Amazon Affiliate business operations with 8 specialized subagents across 5 HTTP endpoints (/ask, /compare, /refund, /chat, /triage). Features human-in-the-loop workflows via Inngest, enterprise-grade security with Argon2id hashing and JWT authentication, Claude API integration for inference, MCP server for tool orchestration, and agent skills for modular task decomposition — a direct fusion of MCP engineering, subagent architecture, and AI-driven entrepreneurship.

▶ LearnFlow + Skills Library — Autonomous App Generator

Certifications: Claude Code in Action • Agent Skills • AI Fluency

Stack: FastAPI • Python 3.11+ • Next.js 14 • React • TailwindCSS • Monaco Editor • PostgreSQL (Neon) • Docker • Kubernetes

An autonomous platform that generates production-ready applications in approximately 30 minutes using reusable AI agent skills — achieving 98.2% token efficiency (compressing 50K tokens to 900). Implements a universal skills library compatible across Claude, GPT-4, and Goose, with real-time code editing via Monaco, containerized deployment, and an agentic workflow that mirrors Claude Code's spec-driven development methodology and AI fluency principles.

► **Reusable Intelligence Shop — Agentic AI E-Commerce**

Certifications: [AI and Entrepreneurship](#) • [Claude Platform 101](#) • [AI Fluency](#)

Stack: FastAPI Microservices • MCP Code Execution • Next.js • AI Skills Marketplace • Cloud-Native Architecture

A cloud-native agentic e-commerce platform for trading modular AI skills — combining MCP-powered code execution, microservices architecture, and an AI marketplace model. Built on Claude Platform integration and AI fluency foundations — demonstrates real-world application of AI entrepreneurship principles: building a commercially viable platform where reusable intelligence modules are packaged, priced, and deployed at scale.

► **Fatima Zehra Men Boutique — AI-Powered E-Commerce**

Certifications: [AI and Entrepreneurship](#) • [Claude API](#) • [AI Fluency](#)

Stack: Next.js 16 • Tailwind CSS • 4 FastAPI Microservices • Neon PostgreSQL • OpenAI/Gemini/Claude AI Chat • Docker Compose • GitHub Actions CI/CD • Kubernetes

Full-stack AI-enhanced e-commerce platform for Pakistani men's clothing featuring 40+ products, integrated OpenAI, Gemini, and Claude API-powered AI chat assistants, 4 independently scalable FastAPI microservices, and a complete DevOps pipeline with Docker Compose, GitHub Actions CI/CD, and Kubernetes manifests — a live demonstration of applying AI fluency and entrepreneurship to real-world retail.

 CERTIFICATIONS & CREDENTIALS

CERTIFICATION & ISSUING BODY	COMPLETED	CRED. ID

✓ Data Science, Machine Learning & AI <i>EHUNAR & IBA Karachi • Cisco Networking Academy</i>	Completed	IBA-DSML

▲ CURRENT SPECIALIZATIONS (IN PROGRESS)

- ▶ Certified Cloud Applied Generative AI Engineer — PIAIC 4th Quarter — Cybersecurity Track
- ▶ Cloud-Native Application Development — Microservices Architecture & Containerization
- ▶ Kubernetes (K8s) & Container Orchestration — Advanced Deployment, Scaling, Helm Charts
- ▶ Docker & Advanced Containerization — Multi-Stage Builds, Registry Management, Security
- ▶ AWS Cloud Deployment — EC2, S3, RDS, Lambda, CloudFormation, Auto-Scaling
- ▶ Google Cloud Platform (GCP) — Cloud Infrastructure & Deployment Strategy
- ▶ DevOps & CI/CD Pipelines — GitOps, IaC, Automated Deployment Workflows
- ▶ Microservices Architecture Patterns — Service Mesh, Event-Driven Architecture
- ▶ Production-Level System Design — ELK Stack, Prometheus, Disaster Recovery
- ▶ Cybersecurity Fundamentals — Penetration Testing (Bnu-Qabil)

🎓 EDUCATION

- Bachelor of Commerce (B.Com)** 2011
University of Karachi • Karachi, Pakistan
- Diploma in Business Administration (DBA)** 2009
Technical Training Centre
- Matriculation with Computer Science** 2007
Madinatul-Ilm High School
- Hifz-ul-Quran (Complete Memorization of the Holy Quran)** 2000
Wifaq-ul-Madaris Al-Arabia, Pakistan
